Geriatric Hip Fractures Dec 28 2020 The global burden of geriatric hip fractures is enormous. From both the patient's and physician's perspective, the injury is complex. A hip fracture often changes a patient's life and/or the life of the patient's family permanently. From the physician's perspective, care of geriatric hip fracture patients requires a multidisciplinary team, which is led by the surgeon and which includes internists and other subspecialists within internal medicine, anesthesiologists, nurses, operating room technicians, social workers, physical therapists, and rehabilitation center coordinators and staff. Nowhere in the orthopedic literature is there a text that guides care for these complex patients from injury through recovery. This text is the first to do so by organizing and synthesizing a large body of literature. Its main themes include pre-operative, operative, and post-operative care of the patient who sustains a geriatric hip fracture. Its main objective is to organize the current body of literature into a cohesive whole so that the busy orthopedic surgeon does not have to undertake a literature search each time he or she wants an answer to the myriad questions that characterize a patient's injury, treatment, and recovery course. With regard to pedagogy, because orthopedic surgeons in training will utilize this book, and because the case study is the central pedagogical tool in the field of orthopedic surgery, this book includes case studies within each chapter, with the author's preferred treatment and decision-making rationale for each case. Selected video supplements reinforce real-world application of knowledge. Practicing orthopedic surgeons, as well as orthopedic residents and fellows in training, will find Geriatric Hip Fractures: A Practical Approach a highly useful and informative resource.

Sol-Gel Materials for Energy, Environment and Electronic Applications Jun 21 2020 This volume provides expert coverage of the state-of-the-art in sol-gel materials for functional applications in energy, environment and electronics. The use of sol-gel technology has become a hotbed for cutting edge developments in many fields due to the accessibility of advanced materials through low energy processes. The book offers a broad view of this growing research area from basic science through high-level applications with the potential for commercialization and industrial use. Taking an integrated approach, expert chapters present a wide range of topics, from photocatalysts, solar cells and optics, to thin films and materials for energy storage and conversion, demonstrating the combined use of chemistry, physics, materials science and engineering in the search for solutions to some of the most challenging problems of our time.

Essentials of Organisational Behaviour Dec 08 2021 Taking a managerial approach and demonstrating the application of behavioural science within the workplace, this text focuses on the essential topics of organisational behaviour. The Essentials text is a new concise version of the long established market leader Management & Organisational Behaviour which has set standards in pedagogy and authorship that few texts have matched. The accessibility of writing style and clarity of presentation makes unfamiliar theory relevant, easily understood and logically applied to the world of work. In 12 chapters, the Essentials version focuses on the core topics of the discipline in a recognisable sequence, starting from the level of individual, though to the group, and finally the organisation.

Myeloma Therapy May 13 2022 Therapeutic options for patients with myeloma have dramatically changed over the past 10 years. Beginning with the advances in therapy resulting from the use of high-dose therapy and autologous bone marrow or stem cell tra-plant, we have more than doubled the median survival for patients as a whole, and have now have a wealth of different biology-based treatment approaches for our patients in all disease stages. This book represents state-of-the-art information from many of the leaders in the plasma cell disorders world. Sections focusing on disease pathogenesis and biology, chemotherapy-based approaches, immune-based therapies, currently approved novel agents, developing targets, supportive care, and other plasma cell disorders provides a comprehensive collection and an excellent resource in this time of rapid change in clinical and preclinical disease knowledge. It is important to realize that these changes did not occur in a vacuum. Partnerships between academic institutions, the pharmaceutical industry, patient advocacy groups, the National Cancer Institute, community onco-gists, and ultimately our patients worked closely together to realize these advances, and to effect the radical changes in therapy we have witnessed over the past few years. This book would not have been possible without contri-tions from each of the gifted scientists and clinicians who worked tirelessly to prepare their individual chapters all the while maintaining commitment to the scientific and clinical mission of advancing care.

The Green Soldier Nov 19 2022 John Gore is eighteen years old in 1862 rural Kentucky. He has struggled his entire life with stuttering and the ridicule associated with it. Unable to speak well, he has focused on writing. Seeing the opportunity for advancement in the military-and with it, respect-John joins the Union army. Unfortunately, his stuttering prevents him from warning a friend of an enemy attack and John watches his friend die. He is racked with guilt and the fear that others saw him fail at the key moment . . . a fear that proves prescient. John soon meets a girl but they must forge a friendship and then courtship through letters, allowing him to express to her what he can't say in person. Meanwhile at home, John's impetuous younger brother causes trouble with garrisoned Union troops angry at Southern sympathizers.

Drug Utilization Research Sep 17 2022 Drug Utilization Research (DUR) is an eclectic scientific discipline, integrating descriptive and analytical methods for the quantification, understanding and evaluation of the processes of prescribing, dispensing and consumption of medicines and for the testing of interventions to enhance the quality of these processes. The discipline is closely related and linked mainly to the broader field of pharmacoepidemiology, but also to health outcomes research, pharmacovigilance and health economics. Drug Utilization Research is a unique, practical guide to the assessment and evaluation of prescribing practices and to interventions to improve the use of medicines in populations. Edited by an international expert team from the International Society for Pharmacoepidemiology (ISPE), DUR is the only title to cover both the methodology and applications of drug utilization research and covers areas such as health policy, specific populations, therapeutics and adherence.

Under the Tulip Tree Jan 21 2023 Sixteen-year-old Lorena Leland's dreams of a rich and fulfilling life as a writer are dashed when the stock market crashes in 1929. Seven years into the Great Depression, Rena's banker father has retreated into the bottle, her sister is married to a lazy charlatan and gambler, and Rena is an unemployed newspaper reporter. Eager for any writing job, Rena accepts a position interviewing former slaves for the Federal Writers' Project. There, she meets Frankie Washington, a 101-year-old woman whose honest yet tragic past captivates Rena. As Frankie recounts her life as a slave, Rena is horrified to learn of all the older woman has endured--especially because Rena's ancestors owned slaves. While Frankie's story challenges Rena's preconceptions about slavery, it also connects the two women whose lives are otherwise separated by age, race, and circumstances. But will this bond of respect, admiration, and friendship be broken by a revelation neither woman sees coming?

The Hope Chest Feb 22 2023 Celebrate the 100th anniversary of the 19th Amendment with this stirring historical novel about women's suffrage! She's searching for her sister. Along the way, she finds a friend . . . and a cause. It's been three years since Violet's sister, Chloe, left home, and Violet is determined to find her! She runs away and follows her sister's trail all the way to New York and then Tennessee. There, she discovers not only Chloe but the fierce fight for women's right to vote. And what a fight it is! Violet and her new friend Myrtle join Chloe in the Suffragists' cause, eager to sway legislators to their side. Violet knows that her parents would surely disapprove of her decisions, but if fighting for justice makes her the wrong kind of girl . . . then why does it feel so right? A perfect Common Core tie-in, The Hope Chest includes back matter with period photographs, historical notes about the suffrage movement, a "Voting in America" timeline, and other activities. It's also a New York State curriculum title for fourth grade. Don't miss Starting from Seneca Falls, another historical novel about women's suffrage from the author of The Hope Chest!

Sisters of Treason Oct 06 2021 "SISTERS OF TREASON, the second novel by Elizabeth Fremantle, is a story of love, politics and tragedy. Beginning early in Mary Tudor's turbulent reign, SISTERS OF TREASON explores the lives of a pair of sisters as dangerously close to the throne as their sister Lady Jane Grey, who died on the executioner's block at the age of 16, after being queen for nine days. After Jane's death, Lady Catherine becomes the focus of plots to thwart Mary Stuart's claim on England's throne. Catherine is a young woman driven by a compulsive and ultimately fatal desire to love and be loved. Clever Lady Mary is burdened with a crooked spine and a tiny stature in an age when physical perfection equates to goodness and vice versa. Both girls have inherited the Tudor blood that is more curse than blessing. It is court painter Levina Teerlinc who helps the girls survive Mary's reign, but when the Queen's sister, the hot-headed Elizabeth, inherits the crown, the world at court becomes increasingly treacherous for the Grey girls. For either girl to marry without the queen's permission would be a potentially fatal political act, perceived as a treasonous grab for the throne, but Elizabeth is unlikely to let either girl ally herself and become an even more dangerous focus for her enemies. Each young woman must decide how far she will go to defy her queen and find the safety and love she longs for"--

Naked Truth Mar 31 2021 "SOMETIMES, IT IS NOT ENOUGH TO BE THE NEWS, SOMETMES, YOU HAVE TO MAKE THE NEWS AS WELL" - James Gordon Bennett, Jr.proprietor, New York Herald It is 1868 and spiritualist TENNESSEE CLAFLIN is smart, sexy and

sometimes clairvoyant. But it is her sister, VICTORIA WOODHULL who is going to make history when she becomes the first woman to run for President of the United States. It starts with the seduction of the richest man in America. Next, they'll take New York City and the suffragist movement by storm, because together, Tennessee and Victoria are a force of Nature. Boldly ambitious, they stop at nothing, while they brush shoulders with Harriet Beecher Stowe and Susan B. Anthony, using enough chutzpah to make a lady blush. That is, until their backstabbing family takes them to court. When their carefully spun lives unravel, out in public and in the Press, Tennessee and Victoria become the media's object of ridicule and they are pilloried with contempt. "Unsexed!" New York Herald, 1872 "Short haired women and long haired men," New York World, 1872 "Nothing more than a shameless prostitute and a Negro." The Guard, Eugene, Oregon, 1872 Told from shifting points of view and using actual news reportage from the era, Naked Truth gives a riveting inside look into the struggle for women's rights after the Civil War. Perfect for book clubs and fans of historical fiction. "The book is based on a true story, and Hayes writes with such care and authenticity, that the reader will likely be unsure where the history ends and the fiction begins."-KIRKUS REVIEWS

Urban Air Pollution in Asian Cities Jul 03 2021 Air pollution has become part of the daily existence of many people who work, live and use the streets in Asian cities. Each day millions of city dwellers breathe air polluted with concentrations of chemicals, smoke and particles that dramatically exceed World Health Organization guideline values. Deteriorating air quality has resulted in significant impacts on human health and environment in Asia. This book provides a comprehensive and comparative assessment of the current status and challenges in urban air pollution management in 20 cities in the Asian region. It examines the effects on human health and the environment and future implications for planning, transport and energy sectors. National and local governments have begun to develop air quality management strategies to address the deterioration in urban air quality; however, the scope and effectiveness of such strategies vary widely. This book benchmarks these air quality management strategies, examines successes and failures in these cities and presents strategies for improving air quality management in cities across Asia and the rest of our rapidly urbanizing world. Information on air quality in Asia is clearly presented with easy-to-read city profiles, tables and graphs. This is an essential resource for all those concerned with urban air quality management, not just in Asia but in cities across our rapidly urbanizing world. Cities covered Bangkok, Beijing, Busan, Colombo, Dhaka, Hanoi, Ho Chi Minh City, Hong Kong, Jakarta, Kathmandu, Kolkata, Metro Manila, Mumbai, New Delhi, Seoul, Shanghai, Singapore, Surabaya, Taipei and Tokyo

Flowcasting the Retail Supply Chain Mar 11 2022 Despite the myriad supply chain management approaches that have been spawned over the last decade or more, retailers have been unable to put a dent in out-of-stocks at store level, Why is that? Andre' Martin, Mike Doherty, and Jeff Harrop- all experienced practitioners, consultants, and implementation specialists in the field of time-phased supply chain planning - have been asking themselves the same question and have come to the conclusion that 1) far less forecasting is needed in the retail supply chain and 2) the only forecasting that needs to happen is at the store shelf. Flowcasting the Retail Supply Chain outlines a breakthrough approach for supply chain planning that mimics the natural flow of products from the factory to the consumer. It is the first and only approach that truly puts the consumer front and center when planning the supply chain.

Orthopedic Traumatology Feb 27 2021 Now in its revised and expanded second edition, this comprehensive, user-friendly text brings the latest evidence to bear on the diagnosis and management of orthopedic trauma patients. Centering on clinical scenarios, each chapter is based on a specific case. Leaders in the field of orthopedic trauma provide their expert opinions on management strategies and techniques while using data as their guide. The book is divided into sections covering the spine, upper and lower extremities, hip and acetabulum, foot and ankle, polytrauma, infection and perioperative management. New chapters in this edition discuss elbow fracture dislocations, femoral neck fractures in the young, Lisfranc injuries and acute post-operative infection. Each chapter describes and summarizes the data in a consistent structure, but achieves this objective in a case-based format. Utilizing the latest literature, Orthopedic Traumatology: An Evidence-Based Approach, Second Edition will continue to serve as a guide for orthopedic residents and practicing physicians alike.

The Exposome Apr 12 2022 The Exposome: A Primer is the first book dedicated to exposomics, detailing the purpose and scope of this emerging field of study, its practical applications and how it complements a broad range of disciplines. Genetic causes account for up to a third of all complex diseases. (As genomic approaches improve, this is likely to rise.) Environmental factors also influence human disease but, unlike with genetics, there is no standard or systematic way to measure the influence of environmental exposures. The exposome is an emerging concept that hopes to address this, measuring the effects of life-long environmental exposures on health and how these exposures can influence disease. This systematic introduction considers topics of managing and integrating exposome data (including maps, models, computation, and systems biology), "-omics"-based technologies, and more. Both students and scientists in disciplines including toxicology, environmental health, epidemiology, and public health will benefit from this rigorous yet readable overview.

Voices in the Mist Aug 04 2021 Marry a Catholic stranger, or flee the only world she's ever known: Headstrong Bruna de Gansard must choose one or the other to protect her Cathar family from the inquisitors. Toulouse, 1229. The inquisitors have arrived to rid the city of Cathar heretics once and for all, and are putting all unmarried girls over the age of 12 to the question. After an incident in the town calls unwanted attention to 14-year-old Bruna, a young Catholic stranger who is sympathetic to the heretics warns her family about the looming danger, and volunteers to marry their daughter to save her from being questioned. But Bruna doesn't want to be forced into marriage, so she chooses flight-which lands her unexpectedly in the midst of a Catholic pilgrimage to Compostela, thrusting her into a life of deceit. When her beauty and her voice bring her to the attention of the powerful Baron de Belascon, who owes fealty to the king of France, Bruna earns the enmity of the baron's bitter and imperious mother and finds herself caught between her allegiance to her own people and the dangerous secret of her origins-a secret that can be revealed at any time after the arrival of a French knight who recognizes her. The Orphans of Tolosa Trilogy comes to a dramatic end in this gripping story of loyalty and betrayal, set amidst the violence and peril of the Albigensian Crusades.

The Red Umbrella Oct 18 2022 The Red Umbrella is a moving tale of a 14-year-old girl's journey from Cuba to America as part of Operation Pedro Pan—an organized exodus of more than 14,000 unaccompanied children, whose parents sent them away to escape Fidel Castro's revolution. In 1961, two years after the Communist revolution, Lucía Álvarez still leads a carefree life, dreaming of parties and her first crush. But when the soldiers come to her sleepy Cuban town, everything begins to change. Freedoms are stripped away. Neighbors disappear. And soon, Lucía's parents make the heart-wrenching decision to send her and her little brother to the United States—on their own. Suddenly plunked down in Nebraska with well-meaning strangers, Lucía struggles to adapt to a new country, a new language, a new way of life. But what of her old life? Will she ever see her home or her parents again? And if she does, will she still be the same girl? The Red Umbrella is a touching story of country, culture, family, and the true meaning of home. “Captures the fervor, uncertainty and fear of the times. . . . Compelling.” –The Washington Post “Gonzalez deals effectively with separation, culture shock, homesickness, uncertainty and identity as she captures what is also a grand adventure.” –San Francisco Chronicle

The Darker Side of Travel Jun 14 2022 The Darker Side of Travel is a contemporary and comprehensive analysis of dark tourism.
