Flown by the American Volunteer Group in China known as the "Flying Tigers," the P-40 Warhawk earned a reputation for its toughness in combat. Facing odds of 6 to 1 in most combat situations, AVG pilots relied on their skill, daring and their aircraft's superior diving speed to achieve victory. By war's end the Tigers had destroyed more than 1200 Japanese planes, with another 700 listed as probables. Their own losses came to 573 aircraft. Originally printed by the U.S. Army Air Force for pilots transitioning to the P-40, this flight manual contains detailed information about one of history's great planes. Originally classified as "restricted," the manual was declassified long ago and is here reprinted in book form. Some color images appear in black and white, and some pages have been slightly reformatted. Care has been taken however to preserve the integrity of the text.
