A wind-tunnel investigation has been conducted in the Langley full-scale tunnel to determine the static longitudinal and lateral characteristics of a model of an ejection seat equipped with a rigid-wing recovery system. Several wing and vertical-tail arrangements were tested as well as various configurations of the ejection seat alone, ranging from unfaired to completely faired seats. This book presents a thorough explanation of the notation of summation, some unusual material on inequalities, an extended treatment of mathematical induction, and basic probability theory (including the explanation that all gambling systems must fail). It also contains a complete treatment of vector algebra (including the dot and cross product). This is usually reserved for a calculus course, but is properly algebra, and so belongs in any algebra book. Since this book deals with algebra from A to Z, it starts at the beginning with the arithmetic of the counting numbers and their extensions, i.e. the negative numbers and the rational numbers. However, these very elementary items are treated from an advanced point of view. The teacher should assign the first three chapters as outside reading, using only one day per chapter for classroom discussion. The remaining chapters cover all of the usual topics in college algebra, but they contain many unusual items not found in the standard college algebra course. As an example, the circle notation for a composite function is now standard material, but this book explains just why that notation is needed. The book concludes with a presentation of the Peano Axioms. This advanced topic should be available to all mathematics students, whether they are first year algebra students or are working for a PhD degree. Some vols. include special issues. This textbook has been produced in collaboration with OCR for use with the new 2015 OCR Economics specification, giving you up-to-date material that supports your teaching. This book will enable students to - Develop subject knowledge, with topic-by-topic insight and advice from Peter Smith, a professorial fellow in: Economics and editor of Economic Review - Demonstrate awareness of current issues in economics and build analytical and evaluative skills with new case studies - Build their quantitative skills with worked examples - Accurately explain key economic concepts and issues by learning the key terms throughout the text and in the end of section glossaries - Prepare for exams with practice questions and activities throughout the book Contents Introduction Section 1 - Microeconomics - Part 1 Scarcity and choice --Chapter 1: Introducing economics - Part 2 How competitive markets work --Chapter 2: The coordination problem --Chapter 3: The nature of demand --Chapter 4: The nature of supply --Chapter 5: Market equilibrium and the price system --Chapter 6: Prices and resource allocation -Part 3 Market failure and government intervention --Chapter 7: Market failure and externalities --Chapter 8: Other forms of market failure --Chapter 9: Government intervention and government failure Microeconomics key terms Microeconomics practice questions Section 2 - Macroeconomics - Part 4 Economic policy objectives and indicators of macroeconomic performance --Chapter 10: Macroeconomic performance: inflation --Chapter 11: Macroeconomic performance: employment and unemployment --Chapter 12: Measuring economic performance: economic growth - Part 5 Aggregate demand and aggregate supply --Chapter 13: Aggregate demand --Chapter 14: Aggregate supply and macroeconomic equilibrium - Part 6 The application of policy instruments --Chapter 15: Macroeconomic policy instruments - Part 7 The global context --Chapter 16: International trade --Chapter 17: The balance of payments and the exchange rate Macroeconomics key terms Macroeconomics practice questions Index The collected volume begins with a brief perspective by one of the conveners, followed by articles in order of increasing stratigraphic age. Eustatic sea-level changes and tectonic warpings of basins are competing mechanisms for explaining many stratigraphic patterns. The model for sea-level changes should be developed first for a basin, since it is allocyclic and leads to a series of time bands in the strata. The residual effects should then be modeled for tectonic patterns affecting the depositional processes. Doing the reverse limits time constraints on the tectonic warping models and will blur the resolution of detailed time surfaces in the strata. Case histories of situations with both tectonic warping and time surfaces marked by sea-level events will lead to improved interpretations of earth history. Volume 1 of 4. Being an Outline of the Development in Modes of Travel from Archaic Vehicles of Colonial Times to the Completion of the First Transcontinental Railroad: the Influence of the Indians on the Free Movement and Territorial Unity of the White Race: the Part Played by Travel Methods in the Economic Conquest of the Continent: and those Related Human Experiences, Changing Social Conditions and Governmental Attitudes which Accompanied the Growth of a National Travel System. Text readability is at the core of successful reading instruction and language learning. To counteract the challenges of complex reading content, text leveling is a vital necessity for readers with limited language access. A transdisciplinary analysis of reading development and linguistic interrelations builds the theoretical foundation of the base-1 method. This method focuses solely on structural and functional text elements on the word, sentence and cohesion level. But this book also discusses the significance of other prevalent readability factors, such as the reader's language knowledge or socio-cultural background. The base-1 method is designed to level early reading texts in German and other alphabetic languages. Experimental tests with a German immersion population has led to a preliminary calibration to demonstrate the validity of this approach. Bernd Nuss ist erfahrener Immersionslehrer in verschiedenen Programmen, die sich über Nord-, Zentral- und Südamerika erstrecken. An der E. E. Waddell Language Academy wirkt er schulintern als Immersion Facilitator, kooperiert mit Bildungsorganisationen und betreut die Praktika von Gaststudierenden an der Schule. Bernd Nuss has worked as an educator and facilitator in English and German language immersion programs all over the Americas and in Europe. In this capacity, he has also been collaborating as a researcher with universities and other educational institutions in Europe, Asia, and the USA. Each issue includes data cumulative from the beginning of the report year. Volume of the United States Tax Court Reports containing case abstracts and opinions of the court regarding cases between July 1, 2013 December 31, 2013. Cases in each volume are listed in the prefatory table. The United States Tax Court is a federal trial court of record established by Congress under Article I of the U.S. Constitution, section 8 providing (in part) that Congress has the power to "constitute Tribunals inferior to the Supreme Court. "The Tax Court specializes in adjudicating disputes over federal income tax, generally prior to the time at which formal tax assessments are made by the Internal Revenue Service. Though taxpayers may choose to litigate tax matters in a variety of legal settings, outside of bankruptcy, the Tax Court is the only forum in which taxpayers may do so without having first paid the disputed tax in full. Parties who contest the imposition of a tax may also bring an action in any United States District Court, or in the United States Court of Federal Claims; however these venues require that the tax be paid first, and that the party then file a lawsuit to recover the contested amount paid (the "full payment rule")." "Morgan Rice's imagination is limitless. In another series that promises to be as entertaining as the previous ones, A THRONE OF SISTERS presents us with the tale of two sisters (Sophia and Kate), orphans, fighting to survive in a cruel and demanding world of an orphanage. An instant success. I can hardly wait to put my hands on the second and third books!" --Books and Movie Reviews (Roberto Mattos) A bundle of the first three books in Morgan Rice's new fantasy series A THRONE FOR SISTERS (A THRONE FOR SISTERS, A COURT FOR THIEVES, and A SONG FOR ORPHANS). Here are three bestselling novels, all in one convenient file, which offer a great introduction to the A THRONE FOR SISTERS series. Over 250,000 words of reading, all for an incredible price—it also makes the perfect gift! In A THRONE FOR SISTERS (Book one), Sophia, 17, and her younger sister Kate, 15, are desperate to leave their horrific orphanage. Orphans, unwanted and unloved, they nonetheless dream of coming of age elsewhere, of finding a better life, even if that means living on the streets of the brutal city of Ashton. Sophia and Kate, also best friends, have each other's backs—and yet they want different things from life. Sophia, a romantic, more elegant, dreams of entering court and finding a noble to fall in love with. Kate, a fighter, dreams of mastering the sword, of battling dragons, and becoming a warrior. They are both united, though, by their secret, paranormal power to read other's minds, their only saving grace in a world that seems bent to destroy them. In A COURT FOR THIEVES (A Throne for Sisters—Book Two), Sophia, 17, finds her world upside down as she is cast from the romantic world of aristocracy and back to the horrors of the orphanage. This time the nuns seem intent on killing her. Yet that doesn't pain her as much as her broken heart. Will Sebastian realize his mistake and come back for her? Her younger sister Kate, 15, embarks on her training with the witch, coming of age under her auspices, mastering the sword, gaining more power than she ever imagined possible—and determined to embark on a quest to save her sister. She finds herself immersed in a world of violence and combat, of a magic she craves—and yet one that may consume her. In A SONG FOR ORPHANS (A Throne for Sisters—Book Three), Sophia, 17, journeys in search of her parents. Her quest takes her to foreign and strange lands—and to a shocking secret she could never imagine. Kate, 15, is summoned by the witch, as her time has come to repay the favor. But Kate is changing, coming of age, become ever more powerful—and what will become of Kate if she makes a deal with darkness? Sebastian, a romantic, follows his heart, throwing it all away to reject his family and find Sophia. But Lady D'Angelica is still bent on killing her—and may have other plans. A THRONE FOR SISTER is a dazzling new fantasy series rife with love, heartbreak, tragedy, action, adventure, magic, sorcery, dragons, fate and heart-pounding suspense. A page turner, it is filled with characters that will make you fall in love, and a world you will never forget. Book #4 in A THRONE FOR SISTERS will be released soon! Shawn Thacker is a trained assassin from the future who seeks revenge on the only other man with his affliction—each life they take forces them both to travel between vastly different past and future eras. Spanning from 22nd century Tokyo to 1950s New Orleans to the Cretaceous Era and beyond, the two mortal rivals are locked in a battle of wills that spans millions of years, all to alter the course of history.
