Michael Swanson's online discussions with literally thousands of NexStar owners made it clear that there was a desperate need for a book such as this - one that provides a complete, detailed guide to buying, using and maintaining NexStar telescopes. Although this book is highly comprehensive, it is suitable for beginners - there is a chapter on "Astronomy Basics" - and experts alike. Celestron's NexStar telescopes were introduced in 1999, beginning with their first computer controlled "go to" model, a 5-inch. More models appeared in quick succession, and Celestron's new range made it one of the two dominant manufacturers of affordable "go to" telescopes. COVERING SHORT & LONG WHEELBASE • VAN • CARAVELLE • BUS 2.0 & 2.5L PETROL AND 1.9 & 2.4L DIESEL ENGINES MANUAL TRANSMISSION & DRIVE SHAFTS • CLUTCH FUEL, IGNITION, LUBRICATION & COOLING SYSTEMS SUSPENSION • STEERING • BRAKING • ELECTRICS BODYWORK • PLUS WIRING DIAGRAMS This Owners' Edition - Workshop Manual covers the VW Transporter Type 4 (T4) which was introduced in December 1990 fitted with 2.0 and 2.5 litre petrol engines and 1.9 and 2.4 litre diesel engines. It has been specially written for the practical owner who wants to maintain a vehicle in first-class condition and carry out the bulk of his or her own servicing and repairs. Comprehensive step-by-step instructions are provided for service and overhaul operations to guide the reader through what might otherwise be unfamiliar and complicated tasks. Numerous drawings are included to amplify the text. With the aid of this manual, many aspects of service, overhaul and repair are within the scope of an owner with a reasonable degree of mechanical aptitude. Some operations however demand more skill. Other jobs require the use of special tools and in some cases testing facilities and techniques that are not generally available. Only you can judge whether a job is within your capabilities. We do however try to assist the reader to come to an informed decision. Whilst every effort has been made to ensure that the information provided is correct, it is obviously not possible to guarantee complete freedom from errors or omissions. Information to be found in the driver's handbook is not necessarily duplicated here and it is not possible within this volume to cover every aspect to be found in the manufacturer's own workshop manual which is of much greater size and complexity. However, it should be consulted if more detailed information is needed. Always remember that you are responsible for your own safety and that of others when working on a vehicle. Take particular care with safety-related systems like the brakes

and steering, and seek professional advice if in any doubt. Never work under a vehicle unless it is properly supported (a single jack is not enough). Take care with power tools, also regard as potentially harmful fuel, lubricants, solvents and sealers which should always be and kept in labelled, sealed containers. With care and common sense, the practical owner can make an excellent job of maintenance and overhaul. The benefits include money saved and the satisfaction of work well done. You will be adding to your knowledge, too: knowing more about the vehicle you own will help you to make logical decisions about what needs to be done, even if it does in some instances have to go into a professional repair shop. The Volkswagen Transporter T4 is a vehicle that will respond to careful regular servicing and is built to a standard that will ensure a long life if this is remembered.

Cognitive mechanisms underlying linguistic communication do not only rely upon retrieval and processing of linguistic information; they also involve constant updating and organizing of this linguistic information in relation with other, more general, cognitive mechanisms. Some existing theoretical models assume such a tight interactive link between domain-general and domain-specific sources of information in the cognitive organization of the linguistic faculty and during language use. Domain-specific constraints may include, for example, grammatical as well as lexical and pragmatic knowledge. Domain-general constraints comprise processing limitations imposed by the cognitive mechanisms of memory, attention, learning, and social interaction. However, much of the existing research tends to focus on one or the other of the aforementioned areas, while integrative accounts are still rather sparse at present. Therefore, the aim of this Research Topic of Frontiers in Cognition is to bring together researchers who, with in their respective research fields and by using different methodologies, represent integrative approaches to the study of language. We invite submissions from a wide range of interrelated areas of research: cognitive

architectures of language, aspects of language processing, linguistic development, bilingualism, language embodiment, neuropsychology of linguistic function, among others. We would like to solicit original research contributions discussing behavioral, neurophysiological, and computational evidence as well as papers on methodological and/or theoretical aspects of the interplay between linguistic and non-linguistic cognitive processes.
