Perfect for fans of Jenn McKinlay and Kate Carlisle, in Agatha award-winning author Cynthia Kuhn's series debut, small-town bookseller and literary event planner Emma Starrs is out to close the book on a killer intent on crashing the party. To help save her family's floundering Colorado bookstore, Starlit Bookshop, newly minted Ph.D. Emma Starrs agrees to plan a mystery-themed dinner party for her wealthy, well-connected high school

classmate Tabitha Baxter. It's a delightful evening of cocktails and conjecture until Tabitha's husband, Tip—hosting the affair in the guise of Edgar Allan Poe's detective C. Auguste Dupin—winds up murdered. In a heartbeat, Emma and her aunt Nora, a famous mystery writer, become suspects. Emma is sure the party's over for Starlit events, until celebrated author Calliope Nightfall, whose gothic sensibilities are intrigued by the circumstances, implores the bookseller to create a Poe-themed launch event for her latest tome. Throwing a bash to die for while searching for additional clues is already enough to drive Emma stark raven mad, but another shocking crime soon reveals that Silvercrest has not yet reached the final chapter of the puzzling case. Someone in this charming artistic community has murder on the mind, and if Emma cannot outwit the killer, she and her beloved aunt will land behind bars, to walk free nevermore.

corresponding photographs. For more than a century, American communities erected monuments to western pioneers. Although many of these statues receive little attention today, the images they depict—sturdy white men, saintly mothers, and wholesome pioneer families—enshrine prevailing notions of American exceptionalism, race relations, and gender identity. *Pioneer Mother Monuments* is the first book to delve into the long and complex history of remembering, forgetting, and rediscovering pioneer monuments. In this book, historian Cynthia Culver Prescott combines visual analysis with a close reading of primary-source documents. Examining some two hundred monuments erected in the United States from the late nineteenth century to the present, Prescott begins her survey by focusing on the earliest pioneer statues, which celebrated the strong white men who settled—and conquered—the West. By the 1930s, she explains, when gender roles began shifting, new monuments came forth to honor the Pioneer Mother. The angelic woman in a sunbonnet, armed with a rifle or a Bible as she carried civilization forward—an iconic figure—resonated particularly with Mormon audiences. While interest in these traditional monuments began to wane in the postwar period, according to Prescott, a new wave of pioneer monuments emerged in smaller communities during the late twentieth century. Inspired by rural nostalgia, these statues helped promote heritage tourism. In recent years, Americans have engaged in heated debates about Confederate Civil War monuments and their implicit racism. Should these statues be removed or reinterpreted? Far less attention, however, has been paid to pioneer monuments, which, Prescott argues, also enshrine white cultural superiority—as well as gender stereotypes. Only a few western communities have reexamined these values and erected statues with more inclusive imagery. Blending western history, visual culture, and memory studies, Prescott's pathbreaking analysis is enhanced by a rich selection of color and black-and-white photographs depicting the statues along with detailed maps that chronologically chart the emergence of pioneer monuments. Not being able to make or see art would be a major deprivation." The Virginia native's creative path began early, and, during the course of her life, she overcame significant barriers in her quest to make and even see art, including serious vision problems, polio, and paralysis. And then there was her gender. In 1957 Blaine was hailed by *Life* magazine as someone to watch, profiled alongside four other emerging painters whom the journalist praised "not as notable women artists but as notable artists who happen to be women." In *Central to Their Lives*, twenty-six noted art historians offer scholarly insight into the achievements of female artists working in and inspired by the American South. Spanning the decades between the late 1890s and early 1960s, this volume examines the complex challenges these artists faced in a traditionally conservative region during a period in which women's social, cultural, and political roles were being redefined and reinterpreted. The presentation—and its companion exhibition—features artists from all of the Southern states, including Dusti Bongé, Anne Goldthwaite, Anna Hyatt Huntington, Ida Kohlmeyer, Lois Mailou Jones, Alma Thomas, and Helen Turner. These essays examine how the variables of historical gender norms, educational barriers, race, regionalism, sisterhood, suffrage, and modernism mitigated and motivated these women who were seeking expression on canvas or in clay. Whether working from studio space, in spare rooms at home, or on the world stage, these artists made remarkable contributions to the art world while fostering future generations of artists through instruction, incorporating new aesthetics into the fine arts, and challenging the status quo. Sylvia Yount, the Lawrence A. Fleischman Curator in Charge of the American Wing at the Metropolitan Museum of Art, provides a foreword to the volume. Contributors: Sara C.
