Perspectives on Science and Culture Dec 16 2019
Edited by Kris Rutten, Stefaan Blancke, and Ronald Soetaert, *Perspectives on Science and Culture* explores the intersection between scientific understanding and cultural representation from an interdisciplinary perspective. Contributors to the volume analyze representations of science and scientific discourse from the perspectives of rhetorical criticism, comparative cultural studies, narratology, educational studies, discourse analysis, naturalized epistemology, and the cognitive sciences. The main objective of the volume is to explore how particular cognitive predispositions and cultural representations both shape and distort the public debate about scientific controversies, the teaching and learning of science, and the development of science itself. The theoretical background of the articles in the volume integrates C. P. Snow's concept of the two cultures (science and the humanities) and Jerome Bruner's confrontation between narrative and logico-

scientific modes of thinking (i.e., the cognitive and the evolutionary approaches to human cognition).

Cyberlaw Dec 08 2021 The text is designed as a basic course in the legal aspects of Internet law (cyberlaw) to be taken by undergraduate and graduate students in diverse disciplines. There are no prerequisites of extensive prior legal knowledge but rather assumes only a very basic knowledge of general legal principles. The text is comprehensive and covers all of the generally recognized major areas of the subject matter. Among the subjects covered is a basic understanding of the Internet, jurisdiction, contracts, torts, crimes, intellectual property in considerable detail, privacy, antitrust, securities, and the taxation of Internet sales. The text is broad enough to be used in a law school curriculum.

Perspectives in Criminal Law May 01 2021

Bioethics in Context Mar 11 2022 In *Bioethics in Context*, Gary Jones and Joseph DeMarco connect ethical theory, medicine, and the law, guiding readers toward a practical and legally grounded understanding of key issues in health-care ethics. This book is uniquely up-to-date in its discussion of health-care law and unpacks the complex web of American policies, including the Patient Protection and Affordable Care Act. Useful case studies and examples are embedded throughout, and a companion website offers a thorough, curated database of relevant legal precedents as well as additional case

studies and other resources.

A History of Civil Litigation Aug 16 2022 The unique focus of the book is first, to argue that civil justice no longer rests on historic foundations such as precedent, fairness, and impartiality, but has shifted to power and influence. Vandall contends that reform in the law (legislative, judicial, and regulatory) is today driven by financial interests, not precedent, not a neutral desire for fairness, and not to "make it better," and he uses products, cases, and policies for much of his argument. He characterizes these policies as a shift from a balanced playing field, negligence, to one that favors injured consumers. The strict liability foreshadowed by Judge Traynor, in *Escola v. Coco Cola* (1944), was not adopted until 1962, when Traynor wrote the majority opinion in *Greenman v. Yuba Power Products* for the California Supreme Court. Second, the book examines the role of persuasive non-governmental agencies, such as the American Law Institute, in reforming and shaping civil justice. --

Adolescent Psychology in Today's World: Global Perspectives on Risk, Relationships, and Development [3 volumes] Jun 02 2021 This groundbreaking three-volume set spotlights how conditions around the world are affecting the healthy development of adolescents in their respective environments, on all six continents. • Offers a holistic range of topics and breadth of

perspectives by addressing the risks, challenges, and strengths of teenagers as a group in countries worldwide

- Features contributions from scholars who are from—or have extensive on-the-ground experience in—the country of focus, paired with a second author shaping the chapter for an English-speaking readership
- Includes an extensive bibliography addressing the study of teen psychology in each country presented and within the larger region
- Provides a glossary of key terms of positive development as well as other important ideas central to this set

Distortion Or Development? Nov 07 2021 SCOTT (Copy 1): From the John Holmes Library Collection.

Seduction, Surrender, and Transformation Aug 04 2021
Seduction, Surrender, and Transformation demonstrates how interpersonal psychoanalysis obliges analysts to engage their patients with genuine emotional responsiveness, so that not only the patient but the analyst too is open to ongoing transformation through the analytic experience. In so doing, the analyst moves from the position of an "interpreting observer" to that of an "active participant and facilitator" whose affective communications enable the patient to acquire basic self-trust along with self-knowledge. Drawing on the current literature on affect, Maroda argues that psychological change occurs through affect-laden interpersonal

processes. Given that most patients in psychotherapy have problems with affect management, the completing of cycles of affective communication between therapist and patient becomes a vitally important aspect of the therapeutic enterprise. Through emotionally open responses to their patients and careful use of patient-prompted self-disclosures, analysts can facilitate affect regulation responsibly and constructively, with the emphasis always remaining on the patients' experience. Moments of mutual surrender - the honest emotional giving over of patient to analyst and analyst to patient - epitomize the emotionally intense interpersonal experiences that lead to enduring intrapsychic change. Maroda's work is profoundly personal. She does not hesitate to share with the reader how her own personality affects her thinking and her work. Indeed, she believes her theoretical and clinical preferences are emblematic of the way in which the analyst's subjectivity necessarily shapes theory choice and practice preferences in general. *Seduction, Surrender, and Transformation* is not only a powerful brief for emotional honesty in the analytic relationship but also a model of the personal openness that, according to Maroda, psychoanalysis demands of all its practitioners.

Christian Perspectives on Politics Jan 17 2020 Minister Wogaman updates his comprehensive discussions on the meaning and importance of politics; the history of

Christian political thought; and church/state relations, the legislation of social morality, and criminal justice issues.

Biopsychosocial Perspectives on Arab Americans Sep 24 2020 This book introduces an interdisciplinary lens by bringing together vital research on culture, psychosocial development, and key aspects of health and disease to address a wide range of salient concerns. Its scholarship mirrors the diversity of the Arab American population, exploring ethnic concepts in socio-historical and political contexts before reviewing findings on major health issues, including diabetes, cancer, substance abuse, mental illness, and maternal/child health. And by including policy and program strategies for disease prevention, health promotion, and environmental health, the book offers practitioners--and their clients--opportunities for proactive care. Featured in the coverage: Family, gender and social identity issues Arab Americans and the aging process Acculturation and ethnic identity across the lifespan Arab refugees: Trauma, resilience, and recovery Cancer: Crossroads of ethnicity and environment Health and well-being: Biopsychosocial prevention approaches Arab American health disparities: A call for advocacy Rich in cultural information and clinical insights, Biopsychosocial Perspectives on Arab Americans is an important reference that can enhance health practices across the disciplines of medicine, nursing, rehabilitation, social

work, counseling, and psychology.

U.S.-Mexico Borderlands Oct 18 2022 The U.S.-Mexican borderlands form the region where the United States and Latin America have interacted with the greatest intensity. In U.S.-Mexico Borderlands, Oscar Martinez has brought together both scholarly essays and primary documents that address the protracted conflict rooted in the vast difference in power between Mexico and its northern neighbor. Each of the seven parts of this new reader explores a key issue in borderlands studies and contains several essays followed by documents such as treaties, government reports, newspaper articles, and interviews.

Perspectives on Projects Sep 05 2021 Modern project management had its genesis in the field of operations research in the late 1940s, but today it is a much more diverse subject. It has evolved and developed a much wider range of methods, techniques, and skills that the project manager can draw upon. Not all these skills are relevant to every project, but an assortment of them will be relevant to most. This book aims to describe for students, researchers and managers the full range of skills that project managers can use to develop their methodologies. The authors group the skills into nine perspectives, representing nine schools of project management research and theory. By attaching a metaphor to each of these perspectives, students,

researchers and managers are better able to understand each approach and decide whether it is best suited to the development of a strategy for managing their project. *Perspectives on Projects* builds upon the various theoretical orientations that the field of project management has developed. Featuring several case studies, drawn from a variety of settings, to illustrate how the different schools can provide different perspectives on projects, this book is an ideal text for anyone involved in project management.

Supervision Jul 03 2021

Methods for Analysing and Reporting EQ-5D Data Oct 06 2021 This open access book is the first published guide about how to analyse data produced by the EQ-5D, one of the most widely used Patient Reported Outcomes questionnaires world wide. The authors provide practical, clear and comprehensive guidance in five concise chapters. Following an overview of the EQ-5D and its analysis, we describe how the questionnaire data – the EQ-5D profile and EQ VAS – can be analysed in different ways to generate important insights into peoples' health. We then show how the value sets which accompany the EQ-5D can be applied to summarise patients' data. The final chapter deals with advanced topics, including the use of Minimally Important Differences, case-mix adjustment, mapping, and more. This book is essential for those new to

analyzing EQ-5D data and will be also be valuable for those with more experience. The methods can be applied to any EQ-5D instrument (for example, the three- and five-level and Youth versions) and many of the methods described will be equally relevant to other Patient Reported Outcomes instruments.

Global Perspectives on the Rule of Law Sep 17 2022
Global Perspectives on the Rule of Law is a collection of original research on the rule of law from a panel of leading economists, political scientists, legal scholars, sociologists and historians. The chapters critically analyze the meaning and foundations of the rule of law and its relationship to economic and democratic development, challenging many of the underlying assumptions guiding the burgeoning field of rule of law development. The combination of jurisprudential, quantitative, historical/comparative, and theoretical analyses seeks to chart a new course in scholarship on the rule of law: the volume as a whole takes seriously the role of law in pursuing global justice, while confronting the complexity of instituting the rule of law and delivering its promised benefits. Written for scholars, practitioners, and policy-makers, Global Perspectives on the Rule of Law offers a unique combination of jurisprudential and empirical research that will be provocative and relevant to those who are attempting to understand and advance the rule of law globally. The

chapters progress from broad questions regarding current rule of development efforts and the concept of rule of law to more specific issues pertaining to economic and democratic development. Specific countries, such as China, India, and seventeenth century England and the Netherlands, serve as case studies in some chapters, while broad global surveys feature in other chapters. Indeed, this impressive scope of research ushers in the next generation of scholarship in this area.

In Search of Self Dec 28 2020 Includes bibliographical references and indexes.

Feminist Perspectives on Family Care Mar 19 2020
This book analyzes the phenomenon of family care for three populations of adult dependents with chronic disabilities: adults with developmental disabilities; adults with serious, persistent mental illness; and the frail elderly. Family care of relatives spanning the life course and across cultures is emphasized.

The Legal Environment of Business Jul 15 2022
The Legal Environment of Business: A Managerial and Regulatory Perspective provides students with an accessible approach to the study of the legal and regulatory environment facing managers in the twenty-first century. This text introduces students to the legal environment of business with a dynamic mix of cases and black-letter law, supported by practical examples.

Performance Perspectives Jan 29 2021 What is 'performance'? What are the boundaries of Performance Studies? How do we talk about contemporary performance practices today in simple but probing terms? What kinds of practices represent the field and how can we interpret them? Combining the voices of academics, artists, cultural critics and teachers, **Performance Perspectives** answers these questions and provides a critical introduction to Performance Studies. Presenting an accessible way into key terminology and context, it offers a new model for analyzing contemporary performance based on six frames or perspectives: - Body - Space - Time - Technology - Interactivity - Organization Drawing on examples from a wide range of practices across site specific performance, virtual reality, dance, applied theatre and everyday performance, **Performance Perspectives** addresses the binary of theory and practice and highlights the many meeting points between studio and seminar room. Each chapter takes the innovative form of a three-way conversation, bringing together theoretical introductions with artist interviews and practitioner statements. The book is supported by activities for discussion and practical devising work, as well as clear guidance for further reading and an extensive reference list across media **Performance Perspectives** is essential reading for anyone studying, interpreting or making performance.

Debating the Presidency: Conflicting Perspectives on the American Executive, 2nd Edition Feb 16 2020

The study of the presidency—the power of the office, the evolution of the executive as an institution, the men who have served—has generated a great body of research and scholarship. What better way to get students to grapple with the ideas of the literature than through conflicting perspectives on some of the most pivotal issues facing the modern presidency? Richard Ellis and Michael Nelson have once again assembled a cadre of top scholars to offer a series of pro/con essays that will inspire spirited debate beyond the pages of the book. Each essay—written in the form of a debate resolution—offers a compelling yet concise view on the American executive. In essays that are new to this edition, contributors debate the repeal of the 22nd Amendment, the abolition of the vice presidency, the extent to which presidential signing statements threaten the separation of powers, and whether the fighting of the war on terror should require relaxing checks on presidential power. Ellis and Nelson introduce each pair of essays, giving students context and preparing them to read each argument critically, so they can decide for themselves which side of the debate they find most persuasive.

Perspectives on Human Communication Jun 21 2020

GIS Research Methods Oct 26 2020 This book

presents a spatially-based multiple methods approach to research serving academic and organizational researchers from across a wide variety of disciplines. For many, consideration of spatial relationships is an important component of their research questions, including those who may not have yet recognized GIS as a valuable tool. The book will provide readers essential steps to conceptualize and implement research and analysis, develop meaningful quantitative and qualitative geographic results and to communicate their findings using the visualization capabilities of GIS to assist decision-makers and affect policy. Furthermore it offers researchers a deeper understanding of social, economic and environmental questions considering spatial relationships in their data. The broad subject area of the project is the integration of spatial analysis as a research methodology. More specifically the book provides practical guidance for the identification, collection and analysis of appropriate research data for analysis in an Esri/ArcGIS context without being specific to a particular version of the software. The objective is to present ArcGIS with an eye towards incorporating spatial analysis as a fundamental component of mixed methods research. Because GIS is, by nature, an integrative technology which can draw together multiple data sources via a common spatial attribute, it is a natural fit for mixed-methods research. GIS provides the

researcher an unparalleled ability to enhance their research incorporating a geographic perspective.

Complexities of Teaching Nov 14 2019 Illustrates how, contrary to popular belief, child centred teaching can be positive, supportive and guiding. The author shows how child-centred teachers can successfully combine the best elements from traditional and modern practices.

The Ties That Bind May 21 2020 The Ties That Bind was organized to review and assess the scientific evidence about the causes of trends in marriage and other forms of intimate unions. The contributors address these two questions: What do we know about the factors that influence the formation of marriages and other intimate unions, the timing of union formation, and the forms that unions take? What factors explain the dramatic changes in union formation we have observed over recent decades? Edited by Linda J. Waite. Co-edited by Christine Bachrach, Michelle Hindin, Elizabeth Thomson, and Arland Thornton.

Abortion, Moral and Legal Perspectives Mar 31 2021 Essays examine the nature of abortion, the Supreme Court's ruling on abortion, and the judicial status of the fetus.

Mindfulness Oct 14 2019 Mindfulness-based approaches to medicine, psychology, neuroscience, healthcare, education, business leadership, and other

major societal institutions have become increasingly common. New paradigms are emerging from a confluence of two powerful and potentially synergistic epistemologies: one arising from the wisdom traditions of Asia and the other arising from post-enlightenment empirical science. This book presents the work of internationally renowned experts in the fields of Buddhist scholarship and scientific research, as well as looking at the implementation of mindfulness in healthcare and education settings. Contributors consider the use of mindfulness throughout history and look at the actual meaning of mindfulness whilst identifying the most salient areas for potential synergy and for potential disjunction. *Mindfulness: Diverse Perspectives on its Meanings, Origins and Applications* provides a place where wisdom teachings, philosophy, history, science and personal meditation practice meet. It was originally published as a special issue of *Contemporary Buddhism*.

Communication as ... Jan 21 2023 In *Communication as...: Perspectives on Theory*, editors Gregory J. Shepherd, Jeffrey St. John, and Ted Striphas bring together a collection of 27 essays that explores the wide range of theorizing about communication, cutting across all lines of traditional division in the field. The essays in this text are written by leading scholars in the field of communication theory, with each scholar employing a particular stance or perspective on what communication

theory is and how it functions. In essays that are brief, argumentative, and forceful, the scholars propose their perspective as a primary or essential way of viewing communication with decided benefits over other views.

Sayonara Amerika, Sayonara Nippon Nov 26 2020

From the beginning of the American Occupation in 1945 to the post-bubble period of the early 1990s, popular music provided Japanese listeners with a much-needed release, channeling their desires, fears, and frustrations into a pleasurable and fluid art. Pop music allowed Japanese artists and audiences to assume various identities, reflecting the country's uncomfortable position under American hegemony and its uncertainty within ever-shifting geopolitical realities. In the first English-language study of this phenomenon, Michael K. Bourdaghs considers genres as diverse as boogie-woogie, rockabilly, enka, 1960s rock and roll, 1970s new music, folk, and techno-pop. Reading these forms and their cultural import through music, literary, and cultural theory, he introduces readers to the sensual moods and meanings of modern Japan. As he unpacks the complexities of popular music production and consumption, Bourdaghs interprets Japan as it worked through (or tried to forget) its imperial past. These efforts grew even murkier as Japanese pop migrated to the nation's former colonies. In postwar Japan, pop music both accelerated and protested the commodification of

everyday life, challenged and reproduced gender hierarchies, and insisted on the uniqueness of a national culture, even as it participated in an increasingly integrated global marketplace. Each chapter in *Sayonara Amerika, Sayonara Nippon* examines a single genre through a particular theoretical lens: the relation of music to liberation; the influence of cultural mapping on musical appreciation; the role of translation in transmitting musical genres around the globe; the place of noise in music and its relation to historical change; the tenuous connection between ideologies of authenticity and imitation; the link between commercial success and artistic integrity; and the function of melodrama. Bourdaghs concludes with a look at recent Japanese pop music culture.

The Middle East Today Apr 12 2022 The new edition of *The Middle East Today* provides an accessible and comprehensive introductory textbook for undergraduate students of Middle East Studies, Middle East politics and geography. This updated and revised edition features a host of pedagogical features to assist students with their learning, including; detailed maps and images, case studies on key issues, boxed sections and suggestions for further reading. The book highlights the current issues facing the Middle East, linking them to the rich political, geographical and cultural history of the region. The author examines the crises and conflicts, both

current and potential, likely to dominate the region in coming years. The second edition has been fully updated and revised to include discussion of such recent events as: the effects of the Arab Spring Turkey's growing influence in the region the dramatic increase in Iran's nuclear capabilities Osama bin Laden's death and declining support for violent extremist movements in the Middle East. Further supplemented by a companion website containing sample chapters, a selection of maps formatted for use in presentations, and annotated links to online resources and websites, *The Middle East Today* is an essential resource for all students of Middle East Studies, Middle East politics and geography.

The Course of Gay and Lesbian Lives Jan 09 2022

The authors argue that there is little support for assuming that homosexuality has a biological basis. Recognizing the many pathways that lead to same-gender sexual orientation, the authors conclude that the cause is much less important than understanding the meaning of being homosexual.

Geographical Gerontology Jul 23 2020 Understanding where ageing occurs, how it is experienced by different people in different places, and in what ways it is transforming our communities, economies and societies at all levels has become crucial for the development of informed research, policy and programmes. This book focuses on the interdisciplinary field of study –

geographical gerontology – that addresses these issues. With contributions from more than 30 leading geographers and gerontologists, the book examines the scope and depth of geographical perspectives, concepts and approaches applied to the study of ageing, old age and older populations. The book features 25 chapters organized into five parts that cover the field's theoretical traditions and intellectual evolution; the contributions of key disciplinary perspectives from population geography, social and cultural geography, health geography, urban planning and environmental studies; the scales of inquiry within geographical gerontology from the global to the embodied; the thematic breadth of contemporary issues of interest that define the field (places, spaces and landscapes of ageing); and a discussion about challenges, opportunities and agendas for future developments in geography and gerontology. This book provides the first comprehensive foundation of knowledge about the state of the art of geographical gerontology that will be of interest to scholars of ageing around the world.

Evolutionary Psychology: Neuroscience Perspectives concerning Human Behavior and Experience Nov 19 2022 This book brings together current perspectives concerning the manner in which human mind, behavior and experience evolved. In addition to the traditional psychological literature, it draws from work in the

cognitive and affective neurosciences, ethology, and genetics. The focus will be on a unification and integration of evolutionary understandings within a broader consideration.

Communication as ... Feb 22 2023 In *Communication as...: Perspectives on Theory*, editors Gregory J. Shepherd, Jeffrey St. John, and Ted Striphas bring together a collection of 27 essays that explores the wide range of theorizing about communication, cutting across all lines of traditional division in the field. The essays in this text are written by leading scholars in the field of communication theory, with each scholar employing a particular stance or perspective on what communication theory is and how it functions. In essays that are brief, argumentative, and forceful, the scholars propose their perspective as a primary or essential way of viewing communication with decided benefits over other views.

The Corporate Transformation of Health Care Feb 27 2021 This new volume illuminates the growing corporate in-roads into the health care system and its probable consequences, especially for physicians and other practitioners. Its fourteen contributors examine both the delivery and supply functions in the health sector in America. Ambulatory care, hospitals, health maintenance organizations, and health promotion activities are each critically dissected. A major thrust of the investigations focuses upon implications for the

medical profession, principally how the increased scrutiny over clinical decision making by corporate purchasers and payors threatens the traditional role and relative autonomy of physicians. Varying theoretical perspectives are debated, with an additional Canadian perspective offered.

Foundations of Educational Technology Apr 19 2020 An engaging book for professional educators and an ideal textbook for certificate, masters, and doctoral programs in educational technology, instructional systems and learning design, *Foundations of Educational Technology, Second Edition* offers a fresh, interdisciplinary, problem-centered approach to the subject, helping students build extensive notes and an electronic portfolio as they navigate the text. The book addresses fundamental aspects of educational technology theory, research and practice that span various users, contexts and settings; includes a full range of engaging exercises for students that will contribute to their professional growth; and offers the following 4-step pedagogical features inspired by M. D. Merrill's *First Principles of Instruction*: TELL: Primary presentations and pointers to major sources of information and resources ASK: Activities that encourage students to critique applications and share their individual interpretations SHOW: Activities that demonstrate the application of key concepts and complex skills with appropriate opportunities for learner

responses DO: Activities in which learners apply key concepts and complex skills while working on practice assignments and/or projects to be created for their electronic portfolios The second edition of this textbook covers the core objectives addressed in introductory educational technology courses while adding new sections on mobile learning, MOOCs, open educational resources, "big data," and learning analytics along with suggestions to instructors and appendices on effective writing, professional associations, journal and trade magazines.

Perspectives.- J. Thomas Dutton, jr., ed. Paleozoic perspectives Feb 10 2022

North Korea May 13 2022 Geographic Perspectives: North Korea provides a concise source of information on the physical environment and culture of the country. By examining the region through many of the sub-disciplines of geography - including historical, political, economic, urban, and medical - these guides serve as a framework to better understand current events. Included are color and black and white maps, photographs, charts, and graphs.

Free Speech On Trial Aug 24 2020 Essays by twenty legal communication scholars consider the eligibility of free speech and the issues associated with its protection, in a collection that considers such topics as unregulated speech and the free market, the concept of

obscenity as expression, symbolic language, and the consequences of pre-publication restraint. Simultaneous. (Politics & Government)

New Perspectives on Regulation Jun 14 2022 As an experiment in reconnecting academia to the broader democracy, this work is designed to invigorate public policy debate by rededicating academic work to the pursuit of solutions to society's great problems.
