Riding in the Zone Aug 28 2020 Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.

The Sibirsky Extreme Project May 25 2020 The Sibirsky (Siberian) Extreme Project was a 2009 motorcycle adventure project by motorcycle adventurer Walter Colebatch to attempt to go into the ultimate depths of Siberia. The project aimed to push the boundaries of what is known and what is possible in terms of motorcycling in Siberia and hoped to ride new routes and tracks that had yet to be explored by adventure motorcyclists to date. On the ambitious schedule were: - the Tuva Track, a vague boggy unriden route linking the Altai and Tuvan Republics, near the Mongolian border, between the towns of Kosh Agach and Mugur Aksy - the Anabar Road from Lensk to Udachny, an unriden route leading further north in Asia than anyone had ridden before (over 66 degrees North). - the Vilyuisky Trakt, an unriden dirt track only completed in early 2009 that runs 1500 kms east (950 miles) between Lensk, Mirny and Yakutsk. - the legendary BAM Road, 4300 km from Vanino on the Pacific Ocean to Taishet in central Siberia; an abandoned road no motorcyclist had ever even attempted in its entirety, let alone ridden. To many adventurers, the BAM Road is the toughest road on the planet. This book covers the planning, the riding, the struggles, the triumphs and the disappointments of this incredibly challenging itinerary.

The Devil's Double May 05 2021 THE DEVIL'S DOUBLE: is the first of 3 autobiographical books chronicling Latif Yahia's incredible life-story. It vividly describes how Latif was forced to become Uday Hussein's 'fidai' (body-double) and gives a unique insight into the extreme extravagance and cruelty of the Saddam regime. Latif survived assassination attempts and witnessed Uday's psychotic temper, rapes, orgy parties, torture atrocities, and sadistic murders. The book has recently been made into a highly-acclaimed movie. Book Description: In 1987, Latif Yahia was taken to Saddam's headquarters to meet Uday, Saddam's eldest son, and told that a great honour had been bestowed upon him: that because of the great likeness between them, he had been chosen to be Uday's double. For many Iraqis it would have been the highlight of their lives, but for Latif, a peace-loving man who did not agree with Saddam's brutal regime, it was not. He refused. Following a week of torture, and realising he would be killed if he continued to refuse, Latif was forced to accept the role. After a gruesome training programme during which he was made to watch over thirty films of torture, hours of tapes of Uday, and undertake a final remodelling of his appearance, Latif was deemed ready. But it was only after the final test, a meeting with Saddam himself, that Latif made his first public appearance. And so began his life as Uday's double - a life on the perimeter of the inner circle of Saddam's eldest son, a witness to the horror of his insane life of debauchery, excess and brutality, and an experience for which he almost paid with his life on more than one occasion. How he was offered a British passport by Saudis to murder a dissident and how they beheaded Latif's Saudi princess lover. How Latif made and lost a fortune. How he strived in vain for a peaceful life and survived 4 more assassination attempts. Forty Shades of Conspiracy: brings Latif's story right up to

His despair as a beggar on the streets and the happiness he found after he met the love of his life. Electric Motorcycles and Bicycles Feb 14 2022 Beginning in 1881, isolated prototypes of electric tricycles and bicycles were patented and sometimes tested. Limited editions followed in the 1940s, but it was not until the lithium-ion battery became available in the first decade of this century that urban pedelecs and more powerful open-road motorcycles--sometimes with speeds of over 200 mph--became possible and increasingly popular. Today's ever-growing fleets of one-wheel, two-wheel and three-wheel light electric vehicles can now be counted in the hundreds of millions. In this third installment of his electric transport history series, the author covers the lives of the innovative engineers who have developed these e-wheelers.

The Breakthrough Company Jan 25 2023 In *The Breakthrough Company*, Keith McFarland pinpoints how everyday companies become extraordinary, showing that luck is a negligible factor. Rather, breakthrough success turns out to be associated with a clearly identifiable set of strategies and skills that anyone in any business can emulate - from small startup to industry paragon. Encouraged by experts such as business legend Peter Drucker and Good to Great author Jim Collins to identify the drivers that enable a company to push past the entrepreneurial phase, McFarland spent five years building and analyzing the world's largest growth-company performance database and interviewing more than 1,500 growth-company executives on four continents. His goal was simple: to identify the secrets of breakthrough. This book is the result. Winnowing a study pool of more than 7,000 companies down to nine that have made the transition to major-player status, McFarland highlights real-world tools and myth-busting insights that can be used by anyone wanting his or her business to join this exclusive circle.

Without a Prop Dec 24 2022 Hinckley, Hunt, Little Harbor and Lyman-Morse are names that conjure up visions of sleek luxury yachts, comfortably slicing through even the roughest ocean waters. In the quest to offer the latest technology, many of their designs now feature water-jets instead of traditional propellers. But the latest thing in propulsion isn't new at all. Today's water-jets are the result of more than two centuries of trial and error, exhilarating successes and frustrating defeats experienced by a cast of inventors, entrepreneurs and adventurers who weren't afraid to lay it all on the line. They include a self-taught craftsman backed by the Founding Fathers, the engineers of the Royal Navy, a small-town Ohio genius, a New Zealand sportsman and an American industrialist. Their efforts, which ranged from back-yard tinkering to daring international expeditions contributed to the spectacular technology that now powers everything from fishing boats to frigates. The water-jet is here to stay. David S. Yetman has been a prolific, award-winning boating writer for more than 15 years. He has written four books and more than 200 articles for a broad range of boating magazines including Boating World, Motor Boating, Offshore, Power & Motoryacht, Sail, Soundings, Trailer Boats and Yachting. As a young man, he was involved in several start-up ventures in design, manufacturing and retail sales before embarking on a career in mechanical design and engineering, rising to the level of Engineering Manager for a high-technology company before retiring in 2001. He has been awarded patents for designs of a wide range of products, including motorcycle frames, laboratory apparatus and automated instruments used in DNA research, and enjoys applying his broad technical experience to boating and writing.
