Routledge Handbook on Tourism in the Middle East and North Africa Dec 08 2021 The Routledge Handbook on Tourism in the Middle East and North Africa examines the importance of tourism as a historical, economic, social, environmental, religious and political force in the Middle East and North Africa (MENA). It highlights the ecological and resource challenges related to water, desert environments, climate change and oil. It provides an in-depth analysis of the geopolitical conditions that have long determined the patterns of tourism demand and supply throughout the region and how these play out in the everyday lives of residents and destinations as they attempt to grow tourism or ignore it entirely. While cultural heritage remains the primary tourism asset for the region as a whole, many new

types of tourisms are emerging, especially in the Arabian Gulf region, where hyper-development is closely associated with the increasingly prominent role of luxury real estate and shopping, retail, medical tourism, cruises and transit tourism. The growing phenomenon of an expatriate workforce, and how its segregation from the citizenry creates a dual socio-economic system in several countries, is unmatched by other regions of the world. Many indigenous people of MENA keep themselves apart from other dominant groups in the region, although these social boundaries are becoming increasingly blurred as tourism, being one socio-economic force for change, has inspired many nomadic peoples to settle into towns and villages and rely more on tourists for their livelihoods. All of these issues and more shape the foundations of this book. This Handbook is the first of its kind to examine tourism from a broad regional and inclusive perspective, surveying a broad range of social, cultural, heritage, ecological and political matters in a single volume. With a wide range of contributors, many of whom are natives of the Middle East and North Africa, this Handbook is a vital resource for students and scholars interested in Tourism, Middle East Studies and Geography.

The Routledge Handbook of Tourism and the Environment Nov 26 2020 This handbook explores and critically evaluates the debates and controversies inherent to tourism's relationship with nature, especially pertinent at a time of major re-evaluation of our relationship with the environment as a consequence of the environmental problems we now face.

Handbook of e-Tourism Nov 14 2019 This handbook provides an authoritative and truly comprehensive overview both of the diverse applications of information and communication technologies (ICTs) within the travel and tourism industry and of e-tourism as a field of scientific inquiry that has grown and matured beyond recognition. Leading experts from around the world describe cutting-edge ideas and developments, present key concepts and theories, and discuss the full range of research methods. The coverage accordingly encompasses everything from big data and analytics to psychology, user behavior, online marketing, supply chain and operations management, smart business networks, policy and regulatory issues - and much, much more. The goal is to provide an outstanding reference that summarizes and synthesizes current knowledge and establishes the theoretical and methodological foundations for further study of

the role of ICTs in travel and tourism. The handbook will meet the needs of researchers and students in various disciplines as well as industry professionals. As with all volumes in Springer's Major Reference Works program, readers will benefit from access to a continually updated online version.
