Children and Adolescents with Mental Health Problems Feb 16 2020 A textbook which uses a problem-orientated, holistic approach to cover mental health problems in children and adolescents. It identifies the child or adolescent's problems and explores the ways in which effective, individualized nursing care may be delivered.

Adolescent Girls: Their Problems & Education Sep 05 2021 Due to economic boom and fast changing scenario in respect of family set up the mind of youngsters is disturbed. The adolescents' girls are facing even more problems in adjusting themselves as social liberation of females is at the peak, nowadays. By now, they were not allowed to expose themselves to the outer world and now they have to explore various aspects of their life which were rather hidden by this time. The increase on nuclear families is another aspect adding to the burden in terms of non-availability of elder's advice in case of any emotional chaos. This way the gap between parents and children is widening day by day, and children feel rather less secure, thereby, facing more and more adolescent's problems and developing various psychological complications. Even further, they are lured by the glamorous world due to excessive house hold approach by multimedia and television. This increasing complexity in their life is causing a major problem in their 'Academic Achievement' and propagation of higher studies. This book has analysed the problems of girls and impact of different problems on their academic achievement & should be useful for teachers and parents of girls.

Handbook of Adolescent Behavioral Problems Dec 20 2022 As we enter the new millennium, promoting sound mental health and positive behavior of adolescents has undeniably taken on greater significance than ever before. To that end, more and more research is confirming what many have suspected for years: environment and community surroundings have a major affect on an adolescent's well-being and overall mental health. And because no single causal agent triggers teenage pathology—and no one-size-fits-all treatment is available—the Handbook of Adolescent Behavior Problems offers a comprehensive and integrative biopsychosocial approach to effective practice. This volume examines not only the psychological and genetic factors underlying dysfunction, it also explores the critical roles that family members, peers, and the larger community play in an adolescent's life. It offers current interdisciplinary perspectives on adolescent development, both functional and pathological, and provides coverage that is clear, accessible, and practical on such topics as: Major disorders, including depression, anxiety, schizophrenia, ADHD, PTSD, developmental delays, and conduct disorders. Behavior problems, such as substance abuse, sexual offenses, teen pregnancy, school failure, gambling, and gang violence. Best practices, reviewing what works (i.e., interventions that have been rigorously validated), what might work (i.e., those in need of further study), and what doesn't work. Residential interventions as well as community treatment. Risk and resiliency factors. Ongoing and emerging pharmaceutical issues. Each chapter focuses on a specific behavior or disorder and is formatted to help readers quickly locate needed information. The Handbook of Adolescent Behavior Problems provides a solid foundation for understanding the adolescent experience and the influence of the family and community as well as much-needed information on the development of evidence-based practices. It is designed to be a one-stop reference for anyone working with adolescents—developmental psychologists, clinical and school psychologists, and education specialists as well as for graduate students in these areas.

Childhood Feeding Problems and Adolescent Eating Disorders Mar 19 2020 How should feeding problems arising in childhood and later eating disorders be assessed and treated? Disturbances in eating arising in infancy, early childhood and adolescence are increasingly being recognized as a major source of distress and disturbance to young people and their families. Childhood Feeding Problems and Adolescent Eating Disorders covers a wide spectrum of phenomena of variable clinical significance, ranging from variations of normal behaviour to serious clinical conditions, such as failure to thrive and anorexia nervosa. In three sections, the following subjects are covered: feeding and weight problems of early childhood nature of anorexia nervosa and of bulimia nervosa treatment of anorexia nervosa and bulimia nervosa. The contributors discuss important issues such as the influence of maternal eating problems, the consequences of early feeding problems and the management of early onset anorexia nervosa. This book will be an important resource for all the paediatricians, psychologists, psychiatrists, nurses, nutritionists and other health professionals concerned with the assessment and treatment of these major clinical problems.

Adolescence Oct 26 2020 Adolescence: The Transitional Years presents the intricate physical, emotional, and behavioral changes that occur during the years between childhood and adulthood. This book provides psychological studies of adolescence and the methods used to gain information about adolescent development. Organized into 12 chapters, this book begins with an overview of the contributions of psychology to understanding the transition from childhood to adulthood. This text then reviews the changes at puberty, including the sequence of development for girls and boys and the underlying physiological mechanisms responsible. Other chapters consider the cultural variations in the mode of transition from childhood to adulthood. This book provides as well a brief overview of the psychological dimensions of self-identity. The final chapter deals with the educational experience for adolescents and examines the factors associated with different levels of educational attainment. This book is a valuable resource for developmental psychologists, sociologists, geneticists, anthropologists, theorists, and research workers.

Adolescent Health Care Jun 02 2021 Adolescent Health Care: Clinical Issues provides an understanding of the main health problems and concerns facing teenagers. This book discusses the major legal decisions and thinking on confidentiality, consent, minor's right to health services, and the limitations of parental and medical authority. Organized into seven parts encompassing 27 chapters, this book begins with an overview of the main issues faced by any health care provider working with adolescents. This text then discusses the ways in which youths visualize their own health problems. Other chapters consider the normal nutritiona ...

Risk Factors for the Development of Eating Problems in Adolescent Girls Nov 26 2020

[The Science of Adolescent Risk-Taking](#) May 13 2022 Adolescence is a time when youth make decisions, both good and bad, that have consequences for the rest of their lives. Some of these decisions put them at risk of lifelong health problems, injury, or death. The Institute of Medicine held three

public workshops between 2008 and 2009 to provide a venue for researchers, health care providers, and community leaders to discuss strategies to improve adolescent health.

Adolescent Health Services Feb 10 2022 Adolescence is a time of major transition, however, health care services in the United States today are not designed to help young people develop healthy routines, behaviors, and relationships that they can carry into their adult lives. While most adolescents at this stage of life are thriving, many of them have difficulty gaining access to necessary services; other engage in risky behaviors that can jeopardize their health during these formative years and also contribute to poor health outcomes in adulthood. Missed opportunities for disease prevention and health promotion are two major problematic features of our nation's health services system for adolescents. Recognizing that health care providers play an important role in fostering healthy behaviors among adolescents, *Adolescent Health Services* examines the health status of adolescents and reviews the separate and uncoordinated programs and services delivered in multiple public and private health care settings. The book provides guidance to administrators in public and private health care agencies, health care workers, guidance counselors, parents, school administrators, and policy makers on investing in, strengthening, and improving an integrated health system for adolescents.

Challenges in Adolescent Health Care Oct 18 2022 Several positive and negative lifelong behaviors are established during adolescence including diet and exercise, sexual conduct, practices related to oral health, smoking, drinking, and the use of legal and illegal substances. The complex issues that adolescents deal with on a daily basis can turn into health problems that persist throughout adulthood. Unfortunately the adolescents who are frequently the most disconnected from routine health care services - those who lack insurance and family support - are often those at greatest risk for multiple and chronic health problems. Therefore, those that are responsible for delivering health care services to adolescents must address the health conditions that require immediate attention while preparing young people to adopt practices that can help improve their future health status and prevent unhealthy behaviors. *Challenges in Adolescent Health Care* studies adolescent health care in the United States, highlights critical health care needs, and identifies service models and components of care that may strengthen and improve health care services, settings, and systems for adolescents. The book explores the nature of adolescent challenges and how they reflect larger societal issues such as poverty, crime and the prevalence of violence. These issues, in addition to lack of comprehensive health coverage, dysfunctional families and the lack of support systems, make providing adequate health care incredibly challenging. *Challenges in Adolescent Health Care* defines high-quality health care, identifies the strengths and weaknesses of various service models and explores various training programs. The book recommends that health care providers must be sensitive to socioeconomic factors and incorporate health care in a broad array of settings including schools, neighborhoods and community centers.

The Promise of Adolescence Aug 16 2022 Adolescence "beginning with the onset of puberty and ending in the mid-20s" is a critical period of development during which key areas of the brain mature and develop. These changes in brain structure, function, and connectivity mark adolescence as a period of opportunity to discover new vistas, to form relationships with peers and adults, and to explore one's developing identity. It is also a period of resilience that can ameliorate childhood setbacks and set the stage for a thriving trajectory over the life course. Because adolescents comprise nearly one-fourth of the entire U.S. population, the nation needs policies and practices that will better leverage these developmental opportunities to harness the promise of adolescence "rather than focusing myopically on containing its risks. This report examines the neurobiological and socio-behavioral science of adolescent development and outlines how this knowledge can be applied, both to promote adolescent well-being, resilience, and development, and to rectify structural barriers and inequalities in opportunity, enabling all adolescents to flourish.

Community Programs to Promote Youth Development Nov 07 2021 After-school programs, scout groups, community service activities, religious youth groups, and other community-based activities have long been thought to play a key role in the lives of adolescents. But what do we know about the role of such programs for today's adolescents? How can we ensure that programs are designed to successfully meet young people's developmental needs and help them become healthy, happy, and productive adults? *Community Programs to Promote Youth Development* explores these questions, focusing on essential elements of adolescent well-being and healthy development. It offers recommendations for policy, practice, and research to ensure that programs are well designed to meet young people's developmental needs. The book also discusses the features of programs that can contribute to a successful transition from adolescence to adulthood. It examines what we know about the current landscape of youth development programs for America's youth, as well as how these programs are meeting their diverse needs. Recognizing the importance of adolescence as a period of transition to adulthood, *Community Programs to Promote Youth Development* offers authoritative guidance to policy makers, practitioners, researchers, and other key stakeholders on the role of youth development programs to promote the healthy development and well-being of the nation's youth.

The Yoga Almanac Dec 16 2019 52 weeks of yoga practice, wisdom, and ritual to help you slow down, restore balance, and nourish mind, body, and spirit. Sequenced by the astrological calendar, *The Yoga Almanac* is a practical guide to help you reintegrate with recurring cosmic rhythms, and invite the sacred into your life through learning, movement, breath, and ritual. Featuring 52 seasonally-themed chapters, the Almanac is a comprehensive jumping off point to deepen your relationship to yoga—and to yourself. Each chapter includes a seasonal theme with an overview of yogic theory, as well as an illustrated asana to begin the physical exploration of your practice. You'll also find weekly rituals to integrate these teachings into your daily life, and a short dharma talk as reference and nod to tradition. Finally, this unique, holistic handbook will help you develop a transformational practice that flows with the cycles of the astrological year—beginning with spring and culminating in winter. Whether you're looking for weekly inspiration, a crash course in yogic theory, or a blueprint for developing your own yoga routine, *The Yoga Almanac* provides a foundation for reconnecting with the deepest parts of yourself and discovering your authentic place in the world.

Challenges in Adolescent Health Care Apr 19 2020 Several positive and negative lifelong behaviors are established during adolescence including diet and exercise, sexual conduct, practices related to oral health, smoking, drinking, and the use of legal and illegal substances. The complex issues that adolescents deal with on a daily basis can turn into health problems that persist throughout adulthood. Unfortunately the adolescents who are frequently the most disconnected from routine health care services - those who lack insurance and family support - are often those at greatest risk for multiple and chronic health problems. Therefore, those that are responsible for delivering health care services to adolescents must address the health conditions that require immediate attention while preparing young people to adopt practices that can help improve their future health status and prevent unhealthy behaviors. *Challenges in Adolescent Health Care* studies adolescent health care in the United States, highlights critical health care needs, and identifies service models and components of care that may strengthen and improve health care services, settings, and systems for adolescents. The book explores the nature of adolescent challenges and how they reflect larger societal issues such as poverty, crime and the prevalence of violence. The book recommends that health care providers must be sensitive to socioeconomic factors and incorporate health care in a broad array of settings including schools, neighborhoods and community centers.

Theory and problems of adolescent development Apr 12 2022

Problems of Adolescence in the Secondary School Jul 15 2022 Published in 1983. Adolescence is a period of change for all and turmoil for some. Many adolescents have problems which are easily identified but for others the problems are more subtle. There is an interaction between their own difficulties and the systems of home, school and their own society. In this case, problems, which are very real, are more difficult to define and to deal with. This book aims to help teachers to recognise and understand the common problems of adolescents, as they are relevant to their schooling. In addition, suggestions are made to help both teachers and adolescents overcome these difficulties. Besides the more immediately obvious issues of learning and behaviour, there is also discussion of sexual behaviour, vandalism and substance abuse. Throughout the book the common theme is that all problem behaviour must be understood and acted upon within a context, and not regarded as examples of individual delinquency. Finally, the

implications of the 1981 Education Act and its impact on teachers is considered. Under this law, a much wider range of young people will be deemed to have special educational needs. Consequently, all teachers of adolescents will need to be aware of the issues raised and discussed in this book. *Forgotten Ages, Forgotten Problems* Jul 23 2020 This monograph examines what is known about the major causes of adolescent morbidity and mortality with a view to assessing the adequacy of current efforts aimed at improving adolescent health and identifying further initiatives to improve our results. It begins with two assumptions: 1) that adolescent health encompasses far more than the absence of physical disease or disability, and 2) that it includes mental and social, as well as physical, well-being. This view of adolescent health implicitly calls for including both behavioral problems and mental disorders among the health community's concerns, a shift in focus that is increasingly endorsed by international and national organizations concerned with health issues.

Adolescent Problems Sep 17 2022 First published in 1997, this book has been updated and revised to bring it in line with new legislation and current concerns. It is an eclectic reference book on adolescent emotional and behavioural problems, covering a range of psychological theories and approaches in a readable style. The theory presented is tied in with practical application using illustrative case studies and there are time-saving interview sheets and other material for teachers/counsellors to use.

Theory and Problems of Adolescent Development, Third Edition Jun 14 2022

Report of the Seminar on Problems of Adolescent Students in Their Academic and Social Surroundings Oct 06 2021

Social Problems and Social Contexts in Adolescence Nov 14 2019 This selection of previously published research papers presents the empirical and theoretical work on the similarities and differences in adolescent development in the U.S. and other countries. Contributors are an international group of scholars assembled at the University of Bielefeld. Their studies are designed to provide a unified source for comparative research on adolescence, and to inform readers about adolescent phenomena and research in other parts of the world.

Behaviour Problems in Children and Adolescents Sep 24 2020 The book *Behaviour Problems in Children and Adolescents* is a sequel to *Teenage Blues* written by the author and Dr. Shalini Singh which was published by Mosaic in the year 2000. Deals with some of the more serious behaviour problems coming under the category of psychiatric disorders in children and adolescents. For example this book deals with these commonly observed but relatively more serious problems which include anxiety disorders, phobias, obsessive compulsive disorders, conduct disorders, attention deficit hyperactivity disorders, autism spectrum disorders, schizophrenia, depression, stammering etc. The book emphasises on a thorough assessment through correct diagnosis and effective management. This book attempts to help parents and teachers identify symptoms of the various disorders, so that the same could be handled right at the onset and effectively. "Tips to parents" draws attention towards not only easily identifying the symptoms but highlights comprehensive assessment, treatment as well as prevention. The cases presented as vignettes give a peep into the gamut of treatment available for these disorders and how children in the present day can be helped to come back to normalcy. The book will be of value to parents, teachers and counsellors. It would also be useful to school social workers, school psychologists, child mental health specialists, students of clinical psychology, child guidance workers, and others who are working in the field of children and adolescents, who all are referred children with different types of behaviour problems.

Sources of Information on Behavioral Problems of Adolescence Dec 08 2021

Developmental Problems of Childhood and Adolescence Jul 03 2021 This book provides a practical guide to, and critical review of, community and individual professional interventions that could ease the lives of children with developmental disorders and mental health problems. A critical review of, and practical guide to, the interventions that could ease the lives of children with developmental disorders and mental health problems. Structured around the stages and developmental tasks in a child's life span, from conception to teenage years. Discusses inherited disorders, intrauterine problems, neonatal and perinatal problems, early childhood attachment and physical disorders, disabilities at school, and problems associated with socialisation. Also covers problems that affect children at all ages, such as learning disabilities, abuse and various psychological and psychiatric disorders. Consistently considers the role of parents, the family, and the community in interventions. Written by a leading expert in clinical child and adolescent psychology and social work. Bridges the gap between psychosocial interventions and medically-based treatments. Can be used alongside Herbert's *Typical and Atypical Development: From Conception to Adolescence* (BPS Blackwell, 2003).

Adolescent Problems as Reflected in Current Periodical Literature Feb 27 2021

Alcohol Problems in Adolescents and Young Adults May 01 2021 Alcohol continues to be the substance of choice for today's youth, leading to serious physical, psychological, and social consequences. *Alcohol Problems in Adolescents and Young Adults* ably addresses this growing trend. The latest entry in the *Recent Developments in Alcoholism* series, it comprehensively presents a wide-ranging clinical picture of teen drinking - epidemiology, neurobiology, behavioral phenomena, diagnostic and assessment issues, prevention and treatment data - in a developmental context. Fifty expert contributors display the scientific rigor, practical wisdom, and nuanced analysis that readers have come to expect from previous volumes. Among the subjects studied in depth: - Initiation of alcohol use/abuse - Risk and protective factors for alcohol dependence - High-risk adolescent populations - Drinking habits of college students - Long-range consequences of teenage drinking - Family-, school-, and community-based prevention programs - Treatment of comorbid substance and psychiatric disorders Clinicians, researchers, and policy makers will find this a bedrock source of evidence-based knowledge, whether one's goal is choosing an age-appropriate assessment tool for eighth graders, preventing drinking among high school students, or understanding the alcohol-friendliness of campus culture. Here is a critical resource for all professionals dedicated to helping youngsters grow up sober.

Helping the Struggling Adolescent Mar 11 2022 A practical resource tool and handbook for everyone striving to help young people through times of struggle. Most of the book is a reference guide to 30 common teenage problems arranged alphabetically--from abuse to suicide. "We need all the help we can get, and Les Parrott has provided a lot of it. Youth workers will find this book invaluable".--Tony Campolo.

Handbook of Adolescent Behavioral Problems Feb 22 2023 The Second Edition of the *Handbook of Adolescent Behavioral Problems* clarifies the current state of treatment and prevention through comprehensive examinations of mental disorders and dysfunctional behaviors as well as the varied forces affecting their development. New or revised chapters offer a basic framework for approaching mental health concerns in youth and provide the latest information on how conditions (e.g., bipolar disorder, suicidality, and OCD) and behaviors (e.g., sex offenses, gang activities, dating violence, and self-harm) manifest in adolescents. Each chapter offers diagnostic guidance, up-to-date findings on prevalence, biological/genetic aspects, risk and resilience factors, and a practical review of prevention and treatment methods. Best-practice recommendations clearly differentiate among what works, what might work, what doesn't work, and what needs further research across modalities, including pharmacotherapy. Key topics addressed include: Families and adolescent development. Adolescent mental health and the DSM-5. Oppositional Defiant Disorder and Conduct Disorder. Autism spectrum disorder. Media and technology addiction. School failure versus school success. Bullying and cyberbullying. The Second Edition of the *Handbook of Adolescent Behavior Problems* is a must-have reference for researchers, clinicians, allied practitioners and professionals, and graduate students in school and clinical child psychology, education, pediatrics, psychiatry, social work, school counseling, and public health.

Adolescent Health Problems Mar 31 2021 Adolescence, a dynamic period of physical and psychological growth, presents young people with a variety of developmental challenges that can have a significant impact on health-related behaviors. Because adolescents exhibit distinct patterns of morbidity and mortality, health practitioners are focusing increased attention on their unique health care needs. *ADOLESCENT HEALTH PROBLEMS: BEHAVIORAL PERSPECTIVES*, edited by Jan L. Wallander and Lawrence J. Siegel, presents the work of leading researchers who investigate the connections between health and behavior in both healthy and chronically ill adolescents. Sponsored by the Society of Pediatric Psychology as part of the series *Advances in Pediatric Psychology*, this ground breaking volume brings the literature of the field up-to-date, providing vital theoretical and clinical findings with broad implications for health promotion in adolescence and beyond.

Adolescent Health Jun 21 2020 This book covers the developmental and health problems unique to the adolescent period of life. It focuses on special needs and public health programs for adolescents. It offers deep insight into smoking, violence, teen pregnancy, HIV/AIDS, and other

problems, along with intervention and prevention strategies. "Anyone serious about improving adolescent health should read this book. It spans theoretical and developmental constructs, summaries of evidence-based interventions for adolescent risk behaviors, metrics, and policy recommendations." —S. Jean Emans, MD, chief, Division of Adolescent Medicine, and Robert Masland Jr., chair, Adolescent Medicine, Children's Hospital Boston, and professor of pediatrics, Harvard Medical School "This is the one single text that students can use to study adolescent health. It includes contributions from many of the world's most accomplished researchers to provide learners with cutting edge information to make the study of adolescence understandable and applicable in practical settings." —Gary L. Hopkins, MD, DrPH, associate research professor and director, Center for Prevention Research, and director, Center for Media Impact Research, Andrews University "This textbook presents an excellent balance in weighing the evidence from the risk and the resilience literature, incorporating research in racially and ethnically diverse populations." —Renée R. Jenkins, MD, FAAP, professor, Department of Pediatrics and Child Health, Howard University College of Medicine "This is an engaging, thorough, and thought-provoking statement of our knowledge about adolescence." —Wendy Baldwin, PhD, director, Poverty, Gender, and Youth Program, Population Council

Adolescent Health Oct 14 2019 This three volume work presents the Office of Technology's assessment of the physical, emotional, and behavioral health status of contemporary American adolescents, including those living in poverty, racial and ethnic minority groups, Native Americans, and rural adolescents. Specific topics covered are identifying risk and protective factors for adolescent health problems, evaluating options in the organization of health services and technologies available to adolescents, assessing options in the conduct of national health surveys to improve collection of adolescent health statistics, and identifying gaps in research on the health and behavior of adolescents.

Adolescent Addiction Aug 24 2020 Adolescent Addiction: Epidemiology, Assessment, and Treatment presents a comprehensive review of information on adolescent addiction, including prevalence and co-morbidity rates, risk factors to addiction, and prevention and treatment strategies. Unlike other books that may focus on one specific addiction, this book covers a wide range of addictions in adolescents, including alcohol, cannabis, tobacco, eating, gambling, internet and video games, and sex addiction. Organized into three sections, the book begins with the classification and assessment of adolescent addiction. Section two has one chapter each on the aforementioned addictions, discussing for each the definition, epidemiology, risk factors, co-morbidity, course and outcome, and prevention and intervention. Section three discusses the assessment and treatment of co-morbid conditions in greater detail as well as the social and political implications of adolescent addictions. Intended to be of practical use to clinicians treating adolescent addiction, the book contains a wealth of information that will be of use to the researcher as well. Contributors to the book represent the US, Canada, the UK, New Zealand, and Australia. About the Editor: Cecilia A. Essau is professor of developmental psychopathology at Roehampton University in London, UK. Specializing in child and adolescent psychopathology, she has been an author or editor of 12 previous books in child psychopathology and is author of over 100 research articles and book chapters in this area. Comprehensive with the state-of-the-art information on important and the most common adolescent addiction Easy to understand and organized chapters Written by international experts

[Adolescent Development and the Biology of Puberty](#) Jan 09 2022 Adolescence is one of the most fascinating and complex transitions in the human life span. Its breathtaking pace of growth and change is second only to that of infancy. Over the last two decades, the research base in the field of adolescence has had its own growth spurt. New studies have provided fresh insights while theoretical assumptions have changed and matured. This summary of an important 1998 workshop reviews key findings and addresses the most pressing research challenges.

The application of secondary school art to problems of adolescent behavior Aug 04 2021

Disease Control Priorities, Third Edition (Volume 8) Dec 28 2020 More children born today will survive to adulthood than at any time in history. It is now time to emphasize health and development in middle childhood and adolescence--developmental phases that are critical to health in adulthood and the next generation. Child and Adolescent Health and Development explores the benefits that accrue from sustained and targeted interventions across the first two decades of life. The volume outlines the investment case for effective, costed, and scalable interventions for low-resource settings, emphasizing the cross-sectoral role of education. This evidence base can guide policy makers in prioritizing actions to promote survival, health, cognition, and physical growth throughout childhood and adolescence.

Personal Problems of the Modern Adolescent May 21 2020

Alcohol Problems Among Adolescents Jan 17 2020 Alcohol misuse presents a major risk for health and well-being throughout the life-span, but youth have a special vulnerability. Alcohol is the most widely used drug by adolescents. For some, this may be one or two isolated occasions of youthful experimentation; for others, the use becomes excessive, placing them in danger of immediate adverse consequences such as accidental injury and alcohol poisoning, or encouraging other high-risk behavior patterns including unprotected sex. Moreover, a pattern of heavy drinking established in adolescence and young adulthood may continue into an adult pattern of alcohol abuse. Concerned communities and institutions across the nation are tackling the problem of alcohol use and abuse by young people. Research-based knowledge is urgently needed to inform these efforts and to ensure that limited prevention resources are used as effectively as possible. The origins of youthful alcohol use and abuse are found within the complex interplay of individual characteristics, family and peer influences, the larger societal context for alcohol use, environmental conditions, and maturational processes that accompany adolescence. This volume, which began as a special issue of the Journal of Research on Adolescence, contains all of the material from the journal issue plus additional chapters. It helps researchers to meet the tremendous challenge of disentangling the key determinants of risk, and developing effective interventions. Primary sources of influence on youthful alcohol use are described, ranging from individual expectancies about alcohol effects and cognitive decision processes to parenting practices, peer influences, social environments, and economic factors; and a corresponding range of prevention interventions is discussed. This book will serve as a primer to those with an interest in developing and improving effective programs and activities to reduce alcohol-related problems among young people. For those engaged in prevention research, the text will provide useful reviews and current findings that should aid in directing future research activities.
